## Course Title

## Tridion Sites Fundamentals

### Learning Objectives:

This course is designed to take users through the main concepts and best practices needed to manage an Tridion Sites Implementation.

The course takes advantage of the Digital eXperience Accelerator (DXA), a fully functional website implementation for Tridion Sites that provides a quick-start foundation for web projects.

This course provides an introduction to Tridion Sites Content Management and will show how Tridion Sites is structured and which items are used to manage and organize content and websites. The features and the benefits of Tridion Sites Interfaces and their functionalities will be described and the trainer will guide the user through practical scenarios and exercises needed to update, create and manage a website.

During the course, a user will learn how to create an entire new website section using most Tridion sites features and functionalities whilst taking advantage of the combined Tridion Sites Interfaces.

### Target Audience:

Users who have never used Tridion Sites before and want to get started with the application to be productive from day one as well as understand the main features of Tridion Sites
