

Secure your AI advantage for today and beyond

About Language Weaver

Language Weaver provides enterprise-grade machine translation that is secure by design, infinitely adaptive and fully scalable. Our solutions enable businesses and government organizations to protect data, accelerate insight, access markets and ignite growth.

Language Weaver is deployed by 12 of the top 20 AmLaw firms, and part of RWS Holdings serving over 80% of the world's top 100 brands, more than three-quarters of Fortune's 20 'Most Admired Companies' and almost all of the top pharmaceutical companies, investment banks, law firms and patent filers.

3,000 language combinations

150+ direct language pairs

50+ patents in linguistic AI innovations

Why Language Weaver

Security by design

In today's world, not having a cohesive machine translation strategy poses security and compliance risks for global organizations. Protect your data with our secure-by-design infrastructure backed by the strictest data residency and privacy provisions across on-premises and cloud platforms. For those looking for expertise along with technology, RWS provides world-class linguists and support resources, also delivering custom and expert consulting options.

Speed and scalability to support growth

Language Weaver solutions can be deployed for a single language pair and a baseline performance level of 2,000 words per minute. Scale as needed to 150+ language pairs with a performance of 500,000+ words per minute.

Domain- and customer-specific adaptability

Leverage unique adaptive capabilities to generate translation output that is tailored and specific to your organization, domain context and business use cases. Continuously enhance and improve translations over time, maximizing the value of AI-powered adaptation across the entire organization.

Ease of use

We offer intuitive user interfaces, simple developer tools and hassle-free integrations that make it easy to manage real-time translations at scale.

Language Weaver technology at a glance

- Flexible deployment via on-premises, cloud or hybrid options
- Browser-based user interface for translating text and documents
- API to integrate real-time translation with existing systems and workflows
- Connectors for popular applications such as Microsoft Office, Chrome, Edge, Firefox, ServiceNow and many more
- Adaptive machine learning that can automatically fine-tune translation performance

Serving global organizations of today and tomorrow

Machine translation is accelerating insight and revolutionizing the way people collaborate and reach global audiences. Our array of use cases spans multilingual content publishing, customer support, compliance management, eDiscovery, digital forensics, intelligence activities and internal communications for commercial and government sectors.

Get in touch today to learn how you can unlock the power of machine translation for extraordinary business outcomes.
