XPP Administration eLearning

The aim of this course is to introduce XPP administrators to all aspects of XPP Administration and how it runs on Windows and Linux.

TARGET AUDIENCE

This course is designed for XPP administrators who want to understand how to effectively administer all elements of their XPP installation.

LEARNING OBJECTIVES

- Understand how XPP Admin works on Linux and Windows.
- Use the XYAdmin tool to manage XPP administration tasks.
- Develop a working knowledge of Document Paths.
- Understand XPP Data hierarchy.
- Understand how to manage Graphics in XPP.
- Understand the Archive/Restore functionality.
- Understand the role of Job Tickets in XPP Administration.
- Demonstrate how to customize the User Work Area and Xbuttons Menu
- Understand how XPP security works in Windows and Linux

COURSE DURATION

The course is 3 hours in duration and can be viewed and then used as a post-course reference tool. This course is broken into 10 modules covering all areas of XPP Admin. Once you complete one module, the next one will become available.

COURSE DETAIL

The course will cover the following topics:

- Demystifying XPP
- Introducing the XY Admin Tool
- Working with Document Paths, Job Handles, The Pathfinder Interface.
- How to set up a new Root Handle
- Background processing, Autoprocessing, and the Conshell
- Referencing Graphics in XPP
- Graphics libraries, IM Config specs and image chase fields
- Using the XPP archive functionality
- Page sizes, DLD entries and save session fields
- XPP Customizations, XYView.ini, Sdedit.ini, and the X Menu
