Professional Services for Tridion

We offer a range of professional services to help you implement, customize and optimize your Tridion content management system.

Implementing a component content management system is a significant undertaking, and it often involves coordinating a lot of moving parts across your organization. Our professional services team are available worldwide to partner with you throughout every stage of your journey with Tridion.

Implementation and Installation

We'll help you install and configure Tridion to meet your specific requirements, with support for on-premises and cloud deployments.

Customization and Development

We can also customize Tridion to match your unique needs, by developing custom modules, web applications, components, style sheets, templates and integrations with other systems.

Training and Education

Our training team helps your staff quickly and confidently optimize their Tridion experience – whether they're developers, content managers or creators – with workshops and best practice coaching.

Strategy and Information Architecture Modelling

We can help you develop content management processes that align with your business goals, focusing on topics such as governance and re-use, and ensure your content is optimized for Tridion.

Content Migration

We provide manual and automated content migration for easy data and asset transfer from your existing content management system or other legacy systems.

Support and Maintenance

Ensure your Tridion-based systems function smoothly with ongoing support, including updates, upgrades, bug fixes and troubleshooting assistance.

Managed Services

We'll ensure your critical applications are up and running with minimal downtime if an outage occurs. This could be a full 24/7 DevOps service for critical systems, or a business-hours service for apps that don't need full-time attention.

Performance Optimization

To enhance the performance of your Tridion-based system, we can review and fine-tune your configuration and infrastructure as your needs evolve.

Multilingual and Localization Support

Extend your Tridion implementation to support multilingual and multicultural content with our translation and localization expertise.

Non-Tridion Development and Testing Services

Our large offshore teams are a cost-effective solution for a range of non-Tridion development projects, with expertise in development, testing and quality assurance.

Get started

By uniting business know-how and product excellence, we're here to optimize your processes and increase connectivity through your entire content lifecycle. Whether you're looking for standard packages or a custom statement of work, let's talk about how we can help.
